

Meet the Buyer Event Eastern Green Link 2, Peterhead

We are inviting local businesses to learn about potential supply chain opportunities with the Eastern Green Link 2 project in the Peterhead area. The project is a joint venture between SSEN Transmission and National Grid Electricity Transmission, in collaboration with our preferred contractors Hitachi Energy and BAM Nuttall.

Work is due to commence on this major project in 2024 to construct a new high voltage direct current (HVDC) converter station in Peterhead, underground cabling and over 400km of high voltage subsea cable to transport renewable energy from the north of Scotland to England.

This project has the potential to create local business opportunities in the following sectors:

- Aggregates and ready-mix concrete supply
- Earthworks
- Building contractors
- Surfacing
- Precast concrete
- Mechanical & Electrical (Fire & Ventilation)
- Large plant hire
- Electrical wholesale distributors
- Small tool & equipment hire
- IPAF/First aid training
- Demineralised water and glycol
- Welfare and site services (accommodation, security, fencing, skip hire, catering, cleaning, office supplies, administration)

Meet the Buyer drop-in event

**Thursday 16 November 2023,
2pm-7pm**

**Peterhead Football Club,
Balmoor Stadium,
Peterhead AB42 1EQ**

We encourage any relevant local businesses to attend this drop-in event and discuss potential opportunities with the project team. For more information contact gillian.doig@sse.com or visit easterngreenlink2.co.uk
