National Grid Electricity Transmission
Scotland to England Green Link (SEGL 2)
Compulsory Purchase Order 2023
Objection

Dear Mr McKenna

I have recently received a letter from National Grid Electricity Transmission plc., their reference SEGL2/00114 dates 11th September 2023, with enclosed documentation providing more detailed information relating to the proposed SGEL2 Project.

My particular interest is a proposed access route for construction traffic through the village of Newsholme and running around the north boundary of my property at the above address. Following a number of discussions with their agents Fisher German LLP, it was my understanding that this access route was unnecessary and would not be included in their revised plans. As National Grid Electricity Transmission plc have not modified their plan as agreed, I make this formal objection to this aspect of their plan.

I enclose a copy of;

- (a) my letter to Fisher German, dated 8th March 2023
- (b) my letter to National Grid, dated 12 September 2023

These letters record the discussions relating to the proposed access, the reasons for my objection and a conclusion that this access is unnecessary.

I trust you will agree that the proposed access route through Newsholme is undesirable and use your powers to persuade National Grid Electricity Transmission to remove this access route from their plan.

Yours sincerely,

Mr D. Breach
